

CATALOGUE 2024

Quality products from WITT

Benefits to you:

- 100 % quality inspection of all products leaving our factory
- Certificates: DIN EN ISO 9001, DIN EN ISO 22000 as well as PED 2014/68/EU, ATEX 2014/34/EU, Directive 93/42/EWG
- State-of-the-art technologies and elaborate quality assurance systems
- Easy, intuitive operation, ergonomics, integration capabilities and cost effectiveness
- Engineered products tailored exactly to your needs

Our product range

In this catalogue you will find our main models and series.
Furthermore we offer special custom-designed products, to your individual specifications.

🎯 Engineering services included. Working closely with you.

Adopting our gas technology to the requirements of the customers is our daily business. Because gas applications are as different and varied as technical gases and gas mixtures. Our decades of experience and extensive know-how will give you the safety you need: for your employees, your material and your processes.

Please talk to us about your requirements - we can help you for sure!

Any other questions?

We provide you with expert answers!

Our front desk will connect you directly to the person in charge.

KM 20 ECO

2 gases | small flows

Small gas mixer especially for dispensing equipment

- variable mixture output
- pre-set gas blends
- various flow capacities

model

KM 20 ECO

KM 20-1 ECO with one outlet

KM 20-2 ECO with two outlets

MM

2 gases | small to medium flows

Compact gas mixer for different applications

- adjustable mixing valve
- mixed gas flow dependent on inlet pressures
- various flow capacities

model

MM-2

MM-2K

MM-2G

MM FLEX

2 gases | small to medium flows

Ultra compact gas mixer for different applications, e.g. welding

- adjustable mixing valve
- adjustable metering valve
- adjustable pressure

model

MM FLEX

BM

2 gases | small flows

Gas mixer for direct cylinder connection (high pressure)

- constant output
- infinitely variable gas blending
- infinitely variable metering
- no additional pressure regulator required
- various flow capacities

model

BM-2

BM-2M (200 bar)

BM-2M (300 bar)

KM10-2 FLEX

2 gases | small flows

Small gas mixer especially for low gas consumption, e.g. in laboratory applications

- variable mixture output
- variable gas blending
- various flow capacities
- new mixing technology, mixed gas receiver is not required

model

KM10-2 Flex

MG Fix

2 or 3 gases | medium to high flows

Pre-set 2 or 3 components gas mixers

- variable mixture output
- mixing range dependent on type of gas
- new mixing technology, mixed gas receiver is not required

model

MG-2 Fix for 2 gases

MG 25-2 capacity range up to approx. 22 Nm³/h

MG 45-2 capacity range up to approx. 46 Nm³/h

MG 75-2 capacity range up to approx. 68 Nm³/h

MG 95-2 capacity range up to approx. 90 Nm³/h

MG 125-2 capacity range up to approx. 135 Nm³/h

MG-3 Fix for 3 gases

MG 45-3 capacity range up to approx. 46 Nm³/h

MG 95-3 capacity range up to approx. 90 Nm³/h

MG 125-3 capacity range up to approx. 135 Nm³/h

options:

Inlet pressure monitoring with alarm module AM3

MG Flex

2 gases | medium to high flows

Adjustable 2 components gas mixers for welding applications

- variable mixture output
- mixing range dependent on type of gas
- new mixing technology, mixed gas receiver is not required

model

MG-2 Flex

MG 25-2 capacity range up to approx. 21 Nm³/h

MG 45-2 capacity range up to approx. 48 Nm³/h

MG 75-2 capacity range up to approx. 65 Nm³/h

MG 95-2 capacity range up to approx. 96 Nm³/h

MG 125-2 capacity range up to approx. 135 Nm³/h

options:

inlet pressure monitoring with
alarm module AM3

KM

2 or 3 gases | small to medium flows

Mixing system for different technical applications

- constant output
- infinitely variable gas blending
- infinitely variable metering
- various flow capacities

model

KM-2 for 2 gases

KM 20-2

KM 30-2

KM 60-2

KM 100-2

KM-3 for 3 gases

KM 20-3

KM 30-3

KM 60-3

KM 100-3

KM-M

2 or 3 gases | medium to high flows

Gas mixer especially for MAP-packaging and flow-pack machines

- constant output
- infinitely variable gas blending
- infinitely variable metering
- various flow capacities
- regulation of outlet pressure
- monitoring of gas supply
- integrated inlet pressure monitoring (alarm module AM3)

model

KM-2M for 2 gases

KM 100-2M
KM 200-2M
KM 300-2M
KM 600-2M

KM-3M for 3 gases

KM 100-3M
KM 200-3M
KM 300-3M
KM 600-3M

option:

optional: automatic shut-off of O₂
when going below the limit

🎯 In our brochure you can read everything you always wanted to know about WITT gas mixers

Gas mixers offer maximum mixing quality, flexibility and economy. But which model is the best for your specific application?

Looking for the right mixer, a lot of questions come up, e.g.

- Which advantages offer the different mixing technologies and mixing valves, such as mechanical, pneumatical or electrical?
- Which design fits best in my installation: compact, mobile or stationary?
- What kind of components are available: pressure monitoring, inline gas analysis, tanks, explosion protection?

Find answers, discover technologies and have a look at our models overview in the new WITT gas mixers brochure.

Download at www.wittgas.com

KM-ME

2 or 3 gases | low to very high flows

Powerful gas mixer especially for highly fluctuating mixing gas output quantities

- adjustable mixing valve
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- various flow capacities
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

KM100-2ME on steel receiver

model

KM-2ME for 2 gases

KM 100-2ME

- mounted on 20 l / 10 bar steel receiver
- mounted on 20 l / 10 bar stainless steel receiver
- mounted on 100 l / 10 bar steel receiver
- mounted on 100 l / 10 bar stainless steel receiver

KM-2ME for 3 gases

KM 100-3ME

- mounted on 20 l / 10 bar steel receiver
- mounted on 20 l / 10 bar stainless steel receiver
- mounted on 100 l / 10 bar steel receiver
- mounted on 100 l / 10 bar stainless steel receiver

options:

- inlet pressure monitoring with alarm module AM3
- surcharge analogue pressure transmitters 2 inlet gases
- surcharge analogue pressure transmitters 3 inlet gases

KM-M+

2 or 3 gases | medium to high flows

Electronic gas mixer with motor-driven mixing valve especially for MAP-packaging and flow-pack machine

- constant output
- infinitely variable gas blending
- infinitely variable metering
- various flow capacities
- regulation of outlet pressure
- monitoring of gas supply
- communication via serial interface (e.g. PLC, PC or 4-20mA/0-10V)
- for operation with mixed gas receiver
- integrated inlet pressure monitoring (alarm module AM3)

model

KM-2M+ for 2 gases

KM 100-2M+
KM 200-2M+

KM-3M+ for 2 gases

KM 100-3M+
KM 200-3M+

options:

operation via touch-screen display
coupling socket set

KM-FLOW

KM-Flow with analysis

2 or 3 gases | medium to high flows

Gas mixer especially for MAP-packaging and flow-pack machines

- electronic Mass Flow Controller (MFC)
- touchscreen
- measured data storage
- may be combined with analysis MAPY LE
- for up to 1000/1500 l/min

model

KM1000-2 FLOW for 2 gases

KM 1000-2 FLOW for flow-pack machines
KM 1000-2 FLOW for vacuum machines

KM1500-3 FLOW for 3 gases

KM 1500-3 FLOW for flow-pack machines
KM 1500-3 FLOW for vacuum machines

MG-2ME

2 gases | low to very high flows

MG50-2ME on steel receiver

Powerful gas mixer especially for high flows and highly fluctuating mixing gas output quantities

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

model

MG 50-2ME

mounted on 100 l / 10 bar steel receiver

mounted on 100 l / 10 bar stainless steel receiver

MG 100-2ME

mounted on 250 l / 11 bar steel receiver

mounted on 250 l / 11 bar stainless steel receiver

MG 200-2ME (see option „external filter“)

options:

inlet pressure monitoring with alarm module AM3

external filter as additional protection for each

gas inlet recommended for MG 50 and MG 100;

mandatory for MG 200

surcharge analogue pressure transmitters 2 inlet gases

Do you need advice?

Our team of experts is there for you: Click on the contact banner on the WITT website and choose whether you want to call us directly, send us an e-mail or have us call you back.

CALLBACK

MG-3ME

3 Gase | low to very high flows

MG50-3ME

Powerful gas mixer especially for high flows and highly fluctuating mixing gas output quantities

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

model

MG 50-3ME

mounted on 100 l / 10 bar steel receiver

mounted on 100 l / 10 bar stainless steel receiver

MG 100-3ME

mounted on 250 l / 11 bar steel receiver

mounted on 250 l / 11 bar stainless steel receiver

MG 200-3ME (see option „external filter“)

options:

inlet pressure monitoring with alarm module AM3

external filter as additional protection for each

gas inlet recommended for MG 50 and MG 100;

mandatory for MG 200

surcharge analogue pressure transmitters 3 inlet gases

alarm module AM3

KM-MEM

for food-grade
gases, conforms to
1935/2004

KM100-2MEM

KM100-3MEM

2 or 3 gases | low to high flows

Powerful gas mixer especially for MAP- and vacuum-packaging machines and highly fluctuating mixing gas output quantities

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.
- integrated inlet pressure monitoring (alarm module AM3)
- monitoring of gas supply
- to be used with mixed gas receiver, incl. inlet pressure monitoring

model

KM-2MEM for 2 gases

KM 100-2MEM

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

KM 200-2MEM

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

KM-3MEM for 3 gases

KM 100-3MEM

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

KM 200-3MEM

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

options:

automatic shut-off e.g. of O₂
when going below the limit

KM-MEM+

for food-grade
gases, conforms to
1935/2004

2 or 3 gases | low to high flows

Electronic gas mixing system with motor-driven mixing valve especially for MAP- and vacuum packaging machines

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- monitoring of gas supply
- communication by serial Interface (e.g. PLC, PC or 4-20mA/0-10V)
- to be used with mixed gas receiver, incl. inlet pressure monitoring

model

KM-2MEM+ for 2 gases

KM 100-2MEM+

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

KM 200-2MEM+

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

KM-3MEM+ for 3 gases

KM 100-3MEM+

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

KM 200-3MEM+

mounted on 20 l / 10 bar steel receiver

mounted on 20 l / 10 bar stainless steel receiver

options:

operation via touch-screen display

coupling socket set

MG-MEM+

for food-grade
gases, conforms to
1935/2004

2 or 3 gases | higher flows

Electronic gas mixing system with motor-driven mixing valve especially for MAP- and vacuum packaging machines with higher flows

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- monitoring of gas supply
- communication by serial Interface (e.g. PLC, PC or 4-20mA/0-10V)
- to be used with mixed gas receiver, incl. inlet pressure monitoring

model

MG-2MEM+ for 2 gases

MG 50-2MEM+

- mounted on 100 l / 10 bar steel receiver
- mounted on 100 l / 10 bar stainless steel receiver
- mounted on 250 l / 11 bar stainless steel receiver
- mounted on 250 l / 11 bar stainless steel receiver

MG-3MEM+ for 3 gases

MG 50-3MEM+

- mounted on 100 l / 10 bar steel receiver
- mounted on 100 l / 10 bar stainless steel receiver
- mounted on 250 l / 11 bar stainless steel receiver
- mounted on 250 l / 11 bar stainless steel receiver

options:

- operation via touch-screen display
- coupling socket set

KD

gas flow controller with O₂ analysis

Electronical flow control systems for modified atmospheres in the food industry

- with integrated zirconia cell for O₂-measurement
- integrated PID control loop for automatic gas flow control
- potential free contacts for min./ max. alarms

model

KD 500-1A MAPY ZRL

options:

sample testing via needle
additional electrochemical sensor for sample testing
heater and thermostat, only electro-chemical sensors

KM-MAPY ZRL

gas mixer and meterer

2-components gas mixers with integrated O₂ analysis

- with integrated zirconia cell for O₂-measurement
- integrated PID control loop for automatic gas flow control
- potential free contacts for min./ max. alarms
- MAPY-analysis

model

KM 100-2M MAPY ZRL
KM 200-2M MAPY ZRL
KM 300-2M MAPY ZRL
KM 600-2M MAPY ZRL

options:

gas mixer M+ (remote control)

KM-10-2 FLEX

2 gases | small flows

Small gas mixer especially for low gas consumption, e.g. in laboratory applications

- variable mixture output
- variable gas blending
- various flow capacities
- new mixing technology, mixed gas receiver is not required

model

KM10-2 FLEX

KM

2 or 3 gases | small to medium flows

Mixing system for different technical applications, e.g. for welding applications

- infinitely variable gas blending
- variable mixture output
- various flow capacities
- certified in accordance to ATEX

model

KM-2 for 2 gases (1 gas flammable)

KM 20-2
KM 30-2
KM 60-2
KM 100-2

KM-3 for 3 gases (max. 2 flammable gases)

KM 20-3
KM 30-3
KM 60-3
KM 100-3

KM-ME Ex

2 or 3 gases | low to very high flows

KM 100-3ME Ex on steel receiver

Powerful gas mixers especially for highly fluctuating mixing gas output quantities

- infinitely variable gas blending
- variable mixture output
- various flow capacities
- separate electrical control panel
- 5 m cable between control unit and mixing device
- certified in accordance to ATEX
- model A with integrated analysis, LC-display, 4-20 mA signal and min./max. alarms (further information in section „Gas analysers“)
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

model

KM-2ME Ex for 2 gases

KM 100-2ME Ex

- A, with integrated analysis
- mounted on 20 l / 10 bar steel receiver
- mounted on 20 l / 10 bar stainless steel receiver
- mounted on 100 l / 10 bar steel receiver
- mounted on 100 l / 10 bar stainless steel receiver

KM-2ME Ex for 3 gases

KM 100-3ME Ex

- mounted on 20 l / 10 bar steel receiver
- mounted on 20 l / 10 bar stainless steel receiver
- mounted on 100 l / 10 bar steel receiver
- mounted on 100 l / 10 bar stainless steel receiver

options:

- inlet pressure monitoring with
- alarm module AM3 (for Ex)
- surcharge analogue pressure transmitters 2 inlet gases
- surcharge analogue pressure transmitters 3 inlet gases

MG-ME Ex

2 or 3 gases | low to very high flows

Powerful gas mixers especially for highly fluctuating mixing gas output quantities

- infinitely variable gas blending
- variable mixture output
- various flow capacities
- separate electrical control panel
- 5 m cable between control unit and mixing device
- certified in accordance to ATEX
- model A with integrated analysis, LC-display, 4-20 mA signal and min./max. alarms (further information in section „Gas Analysers“)
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

model

MG-2ME Ex for 2 gases

MG 50-2ME Ex*

A, with integrated analysis

mounted on 100 l / 10 bar steel receiver

A, with integrated analysis, mounted on

100 l / 10 bar steel receiver

mounted on 100 l / 10 bar stainless steel receiver

A, with integrated analysis, mounted on

100 l / 10 bar stainless steel receiver

MG 100-2ME Ex*

A, with integrated analysis

mounted on 250 l / 11 bar steel receiver

mounted on 250 l / 11 bar stainless steel receiver

MG 200-2ME Ex*

A, with integrated analysis

MG-2ME Ex for 3 gases

MG 50-3ME Ex*

mounted on 100 l / 10 bar steel receiver

mounted on 100 l / 10 bar stainless steel receiver

MG 100-3ME Ex*

mounted on 100 l / 10 bar steel receiver

mounted on 100 l / 10 bar stainless steel receiver

MG 200-3ME Ex*

options:

inlet pressure monitoring with alarm module AM3 (for Ex)

*external filter as additional protection for each gas inlet recommended for MG 50 and MG 100; mandatory for MG 200

analogue pressure transmitters 2 inlet gases

analogue pressure transmitters 3 inlet gases

MED MG

for synthetic air

Worldwide and long-term proven gas mixing system for the production of synthetic air for medical applications

- in accordance with DIN EN ISO 7396-1 section 3.27
- medical product class IIb, CE identification marking according to EG 93/42/EWG
- various flow capacities
- to be used with mixed gas receiver, incl. inlet pressure monitoring
- also for central gas supply installations
- integrated oxygen analyser, redundant design
- various system surveillances
- housing IP55

model

MED MG

MED-MG 50-2ME GB

MED-MG 100-2ME GB

MED-MG 200-2ME GB

MED-MG 500-2ME GB

each with 2 gas filters 077 and printed operation manual

options:

automatic calibration

heating (for low ambient temperatures)

MED-stainless steel receiver (coated) incl.

safety devices and connections:

volume	pressure	design	blow-off output SV*
100 litres	10 bar	vertical	382 Nm ³ /h
250 litres	11 bar	vertical	417 Nm ³ /h
500 litres	11 bar	vertical	795 Nm ³ /h
1.000 litres	11 bar	vertical	795 Nm ³ /h
2.000 litres	11 bar	vertical	2.234 Nm ³ /h
4.000 litres	11 bar	vertical	2.234 Nm ³ /h

* blow-off output of the safety relief valve, different rates on demand (surcharge)

⊙ How does the synthetic air supply from WITT work?

You will find the answers in our special brochure.
Get to know our MED mixer and its safety elements.

Our installation example shows you how the supply systems are designed to ensure maximum safety.

steel receiver

steel receiver, vertical,
without safety devices and connections

without safety devices and connections

Receivers 20 - 250 l: ground coated and pickled
Receivers 500 - 2.000 l: powder coated

- internally degreased and oil-free
- use of humid gases or oxygen may cause corrosion
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -15°C up to +100°C

volume	pressure	design
20 litres	10 bar	horizontal
20 litres	16 bar	horizontal
100 litres	10 bar	horizontal
100 litres	21 bar	horizontal
250 litres	11 bar	horizontal
500 litres	11 bar	vertical
1000 litres	11 bar	vertical
1000 litres	16 bar	vertical
2000 litres	11 bar	vertical
2000 litres	16 bar	vertical

stainless steel receiver

stainless steel receiver, horizontal,
without safety devices and connections

without safety devices and connections

stainless steel receivers, not coated

- internally degreased and oil-free
- recommended especially for high oxygen concentrations (>21%)
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -196°C up to +50°C

volume	pressure	design
20 litres	10 bar	horizontal
20 litres	16 bar	horizontal
100 litres	10 bar	horizontal
100 litres	16 bar	horizontal
100 litres	21 bar	horizontal
250 litres	11 bar	horizontal
250 litres	16 bar	horizontal
250 litres	21 bar	horizontal
500 litres	11 bar	vertical
500 litres	16 bar	vertical
1000 litres	11 bar	vertical
1000 litres	16 bar	vertical
2000 litres	11 bar	vertical
2000 litres	16 bar	vertical

steel receiver

steel receiver, vertical,
incl. safety devices and connections

incl. safety devices and connections

Leak-tested mixed gas receiver made of steel, with ground coat, pickled, passivated

- internally degreased and oil-free
- use of humid gases or oxygen may cause corrosion
- incl. safety relief valve
- up to 250l available as a unit with gas mixer
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -15°C up to +100°C
- operation temperatures of safety relief valve -10°C up to +50°C

volume	pressure	design	blow-off output SV*
20 litres	10 bar	horizontal	117 Nm ³ /h
20 litres	16 bar	horizontal	181 Nm ³ /h
100 litres	10 bar	horizontal	117 Nm ³ /h
100 litres	21 bar	horizontal	181 Nm ³ /h
250 litres	11 bar	horizontal	523 Nm ³ /h
500 litres	11 bar	vertical	523 Nm ³ /h
1000 litres	11 bar	vertical	1880 Nm ³ /h
1000 litres	16 bar	vertical	1750 Nm ³ /h
2000 litres	11 bar	vertical	2490 Nm ³ /h
2000 litres	16 bar	vertical	3265 Nm ³ /h

*blow-off output of the safety relief valve, different rates on demand (surcharge)

surcharge for gas mixer mounted on receiver (up to max. 250 litres)

option for receiver-gas mixer-units: TÜV approval conforms to PED 2014/68/EU, module G

Do you already know our whitepaper gas mixer?

Here you will find the most important information about the advantages, applications and basic technologies for mixing technical gases in a short, concise form.

You can find our white paper under the menu item „Consulting & Service“.

stainless steel receiver

incl. safety devices and connections

stainless steel receiver,
horizontal,

Leak-tested mixed gas receiver made of stainless steel, non coated

- internally degreased and oil-free
- use of humid gases or oxygen may cause corrosion
- incl. safety relief valve
- up to 250l available as a unit with gas mixer
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -196°C up to +50°C
- operation temperatures of safety relief valve depend on model

volume	pressure	design	blow-off output SV*
20 litres	10 bar	horizontal	117 Nm ³ /h
20 litres	16 bar	horizontal	181 Nm ³ /h
100 litres	10 bar	horizontal	117 Nm ³ /h
100 litres	16 bar	horizontal	181 Nm ³ /h
100 litres	21 bar	horizontal	276 Nm ³ /h
100 litres	30 bar	horizontal	375 Nm ³ /h
100 litres	40 bar	horizontal	509 Nm ³ /h
250 litres	11 bar	horizontal	523 Nm ³ /h
250 litres	16 bar	horizontal	741 Nm ³ /h
250 litres	21 bar	horizontal	276 Nm ³ /h
500 litres	11 bar	vertical	523 Nm ³ /h
500 litres	16 bar	vertical	741 Nm ³ /h
1000 litres	11 bar	vertical	1880 Nm ³ /h
1000 litres	16 bar	vertical	1750 Nm ³ /h
2000 litres	11 bar	vertical	2490 Nm ³ /h
2000 litres	16 bar	vertical	3265 Nm ³ /h

*blow-off output of the safety relief valve
(other performances on demand, surcharge)

surcharge for gas mixer mounted on receiver
(up to max. 250 litres)

option for receiver-gas mixer-units: TÜV approval
conforms to PED 2014/68/EU, module G

Your questions - our answers

The new FAQ section will soon be available on our website. Here you will find lots of questions about our products, technical details and maintenance from all product areas.

Feel free to browse through the sections and see what new information you find. Or search for your specific topic by entering your search term.

Do you have specific questions that you would like to see answered?
Write to us with your question - we will be happy to take up your suggestion.

OXYBABY® M+

for food-grade
gases, conforms to
1935/2004

portable O2 / CO2 gas analyser - basic model

Compact handheld O2 / CO2 analyser e.g. for sample testing of MAP-packages

- quick and precise
- data log of 100 results (measurement, date, time, product/line no.)
- administration of product data and product names
- incl. carrying case, spare needles and filters

model

OXYBABY® M+ for O2
OXYBABY® M+ for O2/CO2

option:

connector tube with Luer-Lok-connection

OXYBABY® 6.0

for food-grade
gases, conforms to
1935/2004

portable O2 / CO2 gas analyser - premium model

Compact handheld O2 / CO2 analyser e.g. for sample testing of MAP-packages (premium model)

- quick and precise
- data log of 500 measurements
- administration of product data and product names
- incl. carrying case, spare needles and filters
- minimum sample gas requirement (approx. 2ml)
- minimised response time
- measurement of pressure
- USB-interface
- data-log of 500 results
- comfort operation
- integrated needle and filter checks

model

OXYBABY® 6.0 for O2
OXYBABY® 6.0 for O2/CO2

option:

connector tube with Luer-Lok-connection
bluetooth (e.g. for separate tabletop printer)
further accessories: see page 27
OBCC software see [page 33](#)

OXYBABY® M+ P

basic gas analyser for pressurised pipelines

Mobile O2/ CO2 sample analysis in pressurised pipelines, mainly in welding technology (basic model)

- fast and precise
- battery operation
- integrated memory for the last measurements
- including carrying case and G 1/4 AG connection

model

OXYBABY® M+ P for O2
OXYBABY® M+ P for CO2
OXYBABY® M+ P for O2/CO2

OXYBABY® 6.0 P

premium gas analyser for pressurised pipelines

Mobile O2/ CO2 sample analysis in pressurised pipelines, mainly in welding technology (premium model)

- fast and precise
- data-log of 500 results (analysis values, date, time of measurement)
- including carrying case and G 1/4 AG connection
- administration of up to 25 users
- comfort operation
- simplified menu navigation etc.

model

OXYBABY® 6.0 P for O2
OXYBABY® 6.0 P for CO2
OXYBABY® 6.0 P for O2/CO2

OXYBABY® MED

portable O₂ / CO₂ gas analyser for medical applications

Compact handheld O₂ / CO₂ analyser for checking medical gases

- quick and precise
- data log of last 500 measurements
- administration of users applications and allocations
- hygienic and low maintenance

model

OXYBABY® MED for O₂
OXYBABY® MED for O₂/CO₂

options:

data cable
set of adapter for various connections
bluetooth (e.g. for separate printer)

OXYBABY® Accessories

diverse

Accessories for using the OXYBABY® as a table stand and for premium functions

- for versatile use
- practical and smart

model

table stand for OXYBABY®
connector tube with Luer-Lok-connection

Nur for series 6.0:

tabletop bluetooth printer
OBCC software see [page 33](#)

OXYBABY® Accessories

Canpiercer

Aquacheck

for cans, bottles and mini packages

Special packages are hardly controllable by standard analysis devices. Therefore WITT offers a special construction which is suitable for all OXYBABY® models.

- for head space analysis of cans and bottles, with or without overpressure/gas
- for O₂ and CO₂ analysis of mini packages, e.g. capsules

model

CANPIERCER for cans and bottles
(with set for head space analysis):

for cans without overpressure/gas (z.B. juice)*
for max. height 270 mm, needle length 5.5 mm
order no. 590000156

for cans with overpressure/gas, inkl. bottle adapter*
for max. height 270 mm, needle length 8.5 mm
order no. 590000165
for max. height 390 mm, needle length 8.5 mm
order no. 590000166
for max. height 390 mm, needle length 18.5 mm
order no. 590000325

for cans with high overpressure/gas (strongly sparkling drinks) incl. calibration module and flow control**
for max. height 270 mm, needle length 5.5 mm
order no. 590000239

for cans and bottles, pressure measurement only,
incl. bottle adapter
for max. height 390 mm, needle length 5.5 mm
order no. 590000341

Canpiercer-module (for refitting):
bottle adapter

* other versions on request

AQUACHECK
equipment for the gas analysis of mini packages

AQUACHECK Plus
Aquacheck incl. water container

OXYPAD

tabletop and mobile O₂ / CO₂ gas analyser

Mobile desktop O₂ / CO₂ analyser e.g. for sample testing of MAP-packages - innovative design

- fast, precise and reliable measurement results
- large 7" touch-screen with graphical user interface for intuitive operation
- needle casing keeps the needle clean and safe
- ergonomic needle pen for precise and safe handling
- low weight, ergonomic form and battery

model

OXYPAD	for O ₂
OXYPAD	for CO ₂
OXYPAD	for O ₂ and CO ₂

🎯 OXYPAD: the new device class for QM

The new OXYPAD from WITT offers a range of innovative details that make your work in quality management more pleasant, faster and more efficient:

**LARGE TOUCH SCREEN
FOR SMART HANDLING**

**USB PORT
FOR CHARGING &
EXPORT**

**BATTERY
OPERATION
FOR EASY
MOBILITY**

**SERVICE FLAP
FOR EASY
MAINTENANCE**

**NEEDLE CASING
KEEPS THE NEEDLE
CLEAN AND SAFE**

**NEEDLE PEN
ERGONOMIC AND
PRECISE**

PA 7.0

tabletop O₂ / CO₂ gas analyser

Compact tabletop analyser for sample- and continuous testing of food packages (MAP) and for welding applications

- different designs: P (pressure), L (lance) and S (sample)
- connector set (output and alarm signals)
- with zirconia measuring cell for O₂ for
- quicker measurements

model

PA 7.0 for O ₂	Version P or L
PA 7.0 for CO ₂	Version P or L
PA 7.0 for O ₂ /CO ₂	Version P or L
PA 7.0 for O ₂	Version S
PA 7.0 for O ₂	Version S and L
PA 7.0 for O ₂ /CO ₂	Version S
PA 7.0 for O ₂ /CO ₂	Version S and L

options:

handle
 coupling socket set (output signals; alarm contacts)
 integration of the analysing system in the mixer
 housing
 zirconia measuring cell for O₂
 O₂ measurement in ppm-range (surcharge calibration)
 heating and thermostat, only electro-chemical sensors
 paramagnetic sensor

OBCC software for the documentation of analysis results: see [page 33](#)

MAPY 4.0 / MAPY

reddot design award

for food-grade
gases, conforms to
1935/2004

MAPY 4.0 - inclined display
for use in laboratory

MAPY LE - vertical display
for use as inline analyser

O₂ / CO₂ gas analyser, sample + inline

Premium gas analyser for sample- and continuous testing of food packages (MAP)

- for use in laboratory (housing with inclined display) and in production line (housing with vertical display)
- different designs: P (pressure), L (lance) and S (sample)
- connector set (output and alarm signals)
- optional: zirconia measuring cell for O₂ for quicker measurements
- MAPY LE: ideal also for inline analysis of flow packaging machines; minimisation of gas consumption by combination with the gas mixer KM-FLOW or the KD gas meterer

model

MAPY 4.0 / MAPY LE	O ₂	Version P or L
MAPY 4.0 / MAPY LE	CO ₂	Version P or L
MAPY 4.0 / MAPY LE	O ₂ /CO ₂	Version P or L
MAPY 4.0 / MAPY LE	O ₂	Version S
MAPY 4.0 / MAPY LE	O ₂	Version S and L
MAPY 4.0 / MAPY LE	O ₂ /CO ₂	Version S
MAPY 4.0 / MAPY LE	O ₂ /CO ₂	Version S and L

options:

zirconia measuring cell
paramagnetic measuring cell (incl. larger housing)
external barcode reader
coupling socket set
analysis software GASCONTROL CENTER
fully automatic calibration 1 channel
fully automatic calibration 2 channels
O₂ measurement in ppm-range (surcharge calibration)
heating and thermostat, only electro-chemical sensors
different Ethernet cables
(only for MAPY in vertical housing)

MAPY VAC

O₂ / CO₂ gas analyser, for traysealers and thermoformers

Inline gas analyser for continuous control of modified atmospheres in traysealers and thermoformers

- measures the O₂ or O₂/CO₂ concentration before sealing the package
- with touchscreen or as black box version (BB)
- option: analysis of buffer tank
- ideal in combination with a WITT gas mixer

MAPY VAC with touchscreen

MAPY VAC black box version

model

MAPY VAC O₂ Zr
MAPY VAC O₂ Zr BB
MAPY VAC O₂/CO₂ Zr
MAPY VAC O₂/CO₂ Zr BB
MAPY VAC O₂ Zr, incl. buffer analysis
MAPY VAC O₂ Zr BB, incl. buffer analysis
MAPY VAC O₂/CO₂ Zr, incl. buffer analysis
MAPY VAC O₂/CO₂ Zr BB, incl. buffer analysis

option:

cover IP45

Inline gas analysis

integrated with gas mixer

Gas Analysers for H₂, He, etc. to be combined with WITT gas mixers

- gas mixer and analyser as a compact unit
- integrated analysis with LCD display touchscreen
- min./max. alarms
- for flammable gases certified to ATEX

GC 50

model

analyser system H₂ (Ex, Thermal Conductivity Sensors)
analyser system H₂ (Ex, Thermal Conductivity Sensors)
with additional cut-off valve for flammable gases
analyser system He (Thermal Conductivity Sensors)
analyser system O₂ (chemical)
zirconia measuring cell for analyser system
O₂ (chemical)
analyser system O₂ (paramagnetic)
analyser system CO₂ (infrared)
analyser system O₂ / CO₂ (chemical/infrared)
analyser system O₂ / CO₂ (paramagnetic/infrared)
integration of the analysing system in the mixer
housing (MG 200 without surcharge)

Options

Back-purging device for inline gas analysers
against blocked filters on gas inlets

for WITT gas analysers

Additional functions for optimising the process (except for MAPY and MFA)

- data export and analysis
- automatic calibration
- alarm function
- error advice
- back-purging device against blocked filters

option

digital paperless chart recorder, 3 channels
integration chart recorder in mixer
LED-warning light with horn
digital chart-recorder (only GC 50)
data logger (only GC 50)
implementation of USB interface on the back or the front of the housing
analysis of the flow measurement (4-20mA), without flow-sensor
automatic calibration (not for PA), 1 channel
automatic calibration (not for PA), 2 channels
automatic calibration in Ex-version (not for PA), 1 channel
automatic calibration in Ex-version (not for PA), 2 channels
error advice via e-mail (only in combination with data logger (GC50))

back-purging device for inline gas analysers

OBCC

documentation software for OXYBABY® 6.0 and PA

Windows software for the documentation of analysis measuring results. For OXYBABY® 6.0, P 6.0, Med and PA 7.0

- modern, intuitive interface
- graphic representation of the measured data, verifiable PDF reports
- comfortable data management with import and export function

OBCC full version incl. updates

licence for 1 year
licence for 2 years

MFA 10.0

multi gas analyser

Portable multi gas analyser especially for maintenance and service

- for analysis of up to 15 different combinations of gases
- easy to use 7" colour touchscreen
- continuous analysis
- no calibration necessary after changing gas combination
- 4-20 mA output signal

model

MFA 10.0

HYDROBABY

mobile moisture measurement

Mobile device for analysing moisture in gases

- short response times
- dewpoint from -110° up to 20°C
- latest sensor technology
- easy navigation
- large display
- USB interface for data export

model

HYDROBABY

options:

pressure compensation
4-20 mA outlet

MFA H2O

stationary moisture measurement

Table-top device for analysing moisture in gases

- Features - see HYDROBABY plus:
- overpressure design with metering valve and flow meter, USB interface

model

HYDROBABY

options:

pressure compensation
4-20 mA outlet
integrated vacuum pump with battery and external charger

RLA 100

ambient air monitoring

Compact ambient air monitor for the detection of CO₂

- 2 alarm limits
- 4-digit display and 4 LEDs for visual control of gas concentration
- gas measuring computer with integrated alarm device (light and horn)
- easy wall-mounting

model

RLA 100

RLA compact

ambient air monitoring

Compact ambient air monitoring system for the detection of O₂, CO₂, H₂ etc, incl. gas monitor, transmitter and transmitter cable

- simultaneous monitoring of up to four gas inlets
- freely adjustable limits per software
- data logger
- exceeding the limits generates alarm and triggers a potential free contact

models / versions

gas monitor 1-channel
every additional transmitter channel (max. 4)
transmitter for O₂
transmitter for CO₂- not Ex
transmitter for O₂ Zircos - not Ex
transmitter for combustible gases H₂, methane, ethylene, propane
(under explosion limit -0..50/100% UEG) - Atex: Zone 2, Cat. 3G
transmitter for CO
flow adapter (recommended for calibration)
transmitter cable per meter and transmitter

RLA multichannel

ambient air monitoring

Compact ambient air monitoring system for the detection of O₂, CO₂, H₂ etc, incl. gas monitor, transmitter and transmitter cable

- simultaneous monitoring of up to four gas inlets
- freely adjustable limits per software
- data logger
- exceeding the limits generates alarm and triggers a potential free contact

models / versions

4-channel gas monitor with alarm
 additional channel (up to 16 channels possible)
 transmitter for O₂
 transmitter for CO₂ - not Ex
 transmitter for O₂ Zircos - not Ex
 transmitter for combustible gases H₂, methane, ethylene, propane
 (under explosion limit -0..50/100% UEG) - Atex: Zone 2, Cat. 3G
 transmitter for CO
 flow adapter (recommended for calibration)
 transmitter cable per meter and transmitter

Inlet pressure monitoring

separate inlet pressure
monitoring

with alarm module AM3

For continuous inlet pressure monitoring for maximum process safety

- simultaneous monitoring of up to 3 gas inlets
- freely adjustable limits
- intuitive menu design
- exceeding the limits generates alarm and triggers a potential free contact

Inlet pressure monitoring

separate
for flammable gases as Ex-version with separate control housing

options:
 data cable
 ALARM CONTROL software
 surcharge analogue pressure transmitters, 2 inlet gases
 surcharge analogue pressure transmitters, 3 inlet gases
 surcharge analogue pressure transmitters Ex, 2 inlet gases
 surcharge analogue pressure transmitters Ex, 3 inlet gases

LED warning light with signal-horn

LEAK-MASTER® EASY

bubble-test

For the detection of even the smallest leaks, without operating with trace gas

- for all flexible and stable types of packages, also without modified atmosphere
- easy, intuitive handling
- visual principle of measurement, reveals the position of the leak
- administration and documentation of user and product data (only with control unit PLUS)

LEAK-MASTER® EASY 3

model	chamber size in approx. mm (HxWxD)
EASY 0.5	115 x 305 x 195
EASY 1	165 x 305 x 195
EASY 1.5	145 x 505 x 310
EASY 2	205 x 505 x 310
EASY 3	275 x 625 x 360
EASY 4	320 x 760 x 500
EASY 5	340 x 760 x 500

version with electric vacuum pump instead of compressed air
(not retrofittable) surcharge:

options:	order no.
vacuum-set 956.992700	
vacuum holding valve	800961000
calibrated manometer	800942100
ASTM F2096 testing set	966129800
control unit PLUS	5901LME-Z-003
options for control unit:	
barcode reader IP 65	957099400

control unit PLUS (optional)

LEAK-MASTER® PRO 2

CO₂-based

Fast, non-destructive detection of even the smallest leaks in MAP-packages, CO₂-based

- non-destructive sample leak testing at a strong price-performance ratio
- without using expensive helium or hydrogen
- detects even the smallest of leaks from 10 µm (depending on the product and the test conditions) with highly sensitive and ultra-fast CO₂ sensor
- housing made of acrylic glass
- visual indication of test results (LED lighting)
- 4 chamber sizes for single packages or small boxes
- measuring range 0 ppm - 5.000 ppm
- user and product administration and documentation
- data transfer via ethernet

LEAK-MASTER® PRO 2
model 2.1

LEAK-MASTER® PRO 2
model 2.2

models	chamber size in approx. mm (HxWxD)
LM 2.1	42 x 310 x 200
LM 2.2	174 x 310 x 200
LM 2.3	100 x 460 x 305
LM 2.4	150 x 380 x 380

options:	order no.:
barcode reader IP 65	957099400

version with electric vacuum pump instead of compressed air
(not retrofittable)

LEAK-MASTER® PRO

CO₂-based, for large packages

Fast, non-destructive detection of even the smallest leaks in MAP-packages, CO₂-based

- for large packages and E2-boxes
- detects even the smallest leaks
- measuring range 0 ppm - 5.000 ppm
- user and product administration and documentation
- data transfer via ethernet

models	chamber size in approx. mm (LxWxH)
LM 12.2	140 x 680 x 500
LM 12.2	230 x 680 x 500

options:	order no.:
WLAN (WIFI)	966042600
barcode reader IP 65	957099400
connection for rinsing air	966042500

🎯 Packaging in a modified atmosphere: why and how?

Modified Atmosphere Packaging (MAP) ensures a longer shelf life and an improved impression of freshness in taste, colour and shape. Modified atmosphere counteracts the growth of microbiological organisms and biochemical reactions and thus the spoilage of the product.

Our videos tell you everything you need to know to get started. And, of course, how you can optimise your quality control.

Part 1 - Basics

Part 2 - system components

LEAK-MASTER® MAPMAX

CO₂-based, 100% inline solution

Fast, non-destructive detection of even the smallest leaks in MAP-packages, CO₂-based

- for large packages and E2-boxes
- detects even the smallest leaks
- measuring range 0 ppm - 5.000 ppm
- user and product administration and documentation
- data transfer via ethernet
- integration in the packaging process
- automatic product positioning
- automatic product transport to the following process
- up to 15 cycles per minute

The prices refer to the standard version of the machines. All sizes imply: LxWxH (the width „W“ refers to the moving direction of the conveyor-belt). The height includes the alarm lamp.

models

size in approx. mm (LxWxH)

MAPMAX Type 400 1840 x 1130 x 2200
max. product dimensions 600 x 400 x 380 mm
up to 15 cycles per minute

MAPMAX Type 700 1840 x 1130 x 2200
max. product dimensions 600 x 680 x 220 mm
up to 15 cycles per minute

options:

WLAN (WIFI)
barcode reader IP 65

MINK vacuum pump
central vacuum layout (control valve central vacuum)
surface pressurisation (incl. motorisation)
e.g. to speed up and improve the measurements for packages with a low gas volume

Accessories

barcode reader

for WITT leak detectors

For process optimisation with models EASY PLUS, PRO and MAPMAX

WIFI (not for Control Unit PLUS)

barcode reader IP 65

Test-Leak (60µ) for the inspection of measuring and testing equipment
(only for LEAK-MASTER® MAPMAX and PRO)

PATBOX

wireless

Compact logger for pressure and temperature

- highly mobile and accurate
- extremely small size
- high process reliability
- simple transmission of data via NFC
- operation via Android App

model
PATBOX

🎯 Leak testing methods in comparison

Many industrial products have to be leak-tight. For example, food, cosmetics or pharmaceutical packaging, but also products such as lights in the automotive industry, electronics or plastic components.

But how can manufacturers test the leak-tightness of their products?

Geert Elie from WITT gives an overview of the possibilities and explains the advantages and disadvantages in [this interview](#).

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

RF53N

connections 1/4", 3/8", 1/2"

Universal flashback arrestors certified to DIN EN ISO 5175-1, our best-seller

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV]
- every arrestor 100% tested
- BAM certified
- 25.5 X 82 mm, 191 g
- acetylene max. 13 m³/h
- fuel gases max. 68 m³/h
- oxygen max. 187 m³/h

Also available in stainless steel

connection	inlet → outlet	order no.
------------	----------------	-----------

for fuel gases:

G 1/4 LH	MG → AGS	145-009
G 3/8 LH	MG → AGS	145-012
G 1/2 LH	MG → AGS	145-016
9/16" LH	MG → AGS	145-017

for oxygen:

G 1/4 RH	MG → AGS	145-021
G 3/8 RH	MG → AGS	145-022
G 1/2 RH	MG → AGS	145-023
9/16" RH	MG → AGS	145-057

for fuel gases or oxygen:

1/4" NPT	IG → IG	145-197
3/8" NPT	IG → IG	145-205
G 1/4 RH	IG → IG	145-125

RF53DN

connections G 1/4", G 3/8", G 1/2"

Universal flashback arrestors certified to DIN EN ISO 5175-1 with pressure relief valve [RV]

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], pressure relief valve [RV]
- every arrestor 100% tested
- BAM certified
- 25.5 X 101 mm, 260 g
- acetylene max. 11.5 m³/h
- fuel gases max. 105 m³/h
- oxygen max. 56 m³/h

connection	inlet → outlet	order no.
------------	----------------	-----------

for fuel gases:

G 3/8 LH	MG → AGS	145-041
G 1/2 LH	MG → AGS	145-043
9/16" LH	MG → AGS	145-044

for oxygen:

G 1/4 RH	MG → AGS	145-048
G 3/8 RH	MG → AGS	145-049
G 1/2 RH	MG → AGS	145-050
9/16" RH	MG → AGS	145-051

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

RF53NSK

connections 1/4", 3/8"

Flashback arrestors certified to DIN EN ISO 5175-1 with integrated coupling body

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- BAM certified
- 25.5 X 110 mm, 248 g
- acetylene max. 13 m³/h
- fuel gases max. 68 m³/h
- oxygen max. 187 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	 MG → coupling body	145SK-002
9/16" LH	 MG → coupling body	145SK-004
for oxygen:		
G 1/4 RH	 MG → coupling body	145SK-008
G 3/8 RH	 MG → coupling body	145SK-001
9/16" RH	 MG → coupling body	145SK-003

📺 Already a classic: our most seen video

Get to know how flashback arrestors work, and learn everything about the relevant safety elements and their operation in an impressive 3D animated video.

And see the dramatic consequences of cutting costs on safety technology in [this video](#).

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

85-10

connections 1/4", 3/8", 1/2"

Standard flashback arrestor, certified to DIN EN ISO 5175-1 for higher flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- BAM certified
- 34 X 106 mm, 434 g
- acetylene max. 22 m³/h
- fuel gases max. 235 m³/h
- oxygen max. 310 m³/h

Also available in stainless steel

connection	inlet → outlet	order no.
------------	----------------	-----------

for fuel gases:

G 3/8 LH	MG → AGS	143-002
G 1/2 LH	MG → AGS	143-008
9/16" LH	MG → AGS	143-009

for oxygen:

G 1/4 RH	MG → AGS	143-013
G 3/8 RH	MG → AGS	143-016
G 1/2 RH	MG → AGS	143-019
9/16" RH	MG → AGS	143-022

for fuel gases or oxygen:

1/4" NPT	IG → IG	143-323
3/8" NPT	IG → IG	143-105
G 3/4 RH	IG → IG	143-227

85-20

connections 3/4", 1/2", 1"

Standard flashback arrestor, certified to DIN EN ISO 5175-1 for higher flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV]
- every arrestor 100% tested
- 62 X 131/137 mm, 1400-1500 g
- acetylene max. 45 m³/h
- fuel gases max. 324 m³/h
- oxygen max. 333 m³/h

Also available in stainless steel

connection	inlet → outlet	order no.
------------	----------------	-----------

for fuel gases:

G 3/4 LH	MG → AGS	149-001
----------	----------	---------

for oxygen:

G 3/4 RH	MG → AGS	149-014
----------	----------	---------

for fuel gases or oxygen:

G 1/2 RH	IG → IG	149-002
1/2" NPT	IG → IG	149-003
G 3/4 RH	IG → IG	149-005
3/4" NPT	IG → IG	149-006
G 1 RH	IG → IG	149-004
1" NPT	IG → IG	149-017

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

85-30

connections 3/4", 1", 1.1/2"

Flashback arrestors certified to DIN EN ISO 5175-1, standard for maximum flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- 84 X 162/188 mm, 4.580 g
- acetylene max. 70 m³/h
- fuel gases max. 675 m³/h
- oxygen max. 860 m³/h

Also available in stainless steel

connection	inlet → outlet	order no.
for fuel gases (except acetylene):		
G 3/4 LH	MG → AGS	147-001
G 1 LH	MG → AGS	147-003
for oxygen:		
G 3/4 RH	MG → AGS	147-065
G 1 RH	MG → AGS	147-068
for fuel gases (except acetylene) or oxygen:		
3/4" NPT	IG → IG	147-081
1" NPT	IG → IG	147-072
G 1.1/2 RH	IG → IG	147-069
1/2" NPT	IG → IG	147-083
for acetylene (EPDM sealing ring):		
G 3/4 LH	MG → AGS	147-117
G 1 LH	MG → AGS	147-118
G 1 RH	IG → IG	147-123
G 1.1/2 RH	IG → IG	147-116
1/2" NPT	IG → IG	147-119
3/4" NPT	IG → IG	147-120
1" NPT	IG → IG	147-121

🕒 Every flashback arrestor 100% tested

WITT stands for the highest quality, made in Germany. In addition to setting engineering standards, we use the best materials, excellent workmanship and a seamless quality assurance system. We developed our own testing equipment and procedures for testing every single flashback arrestor before delivery. Safe as it gets.

The WITT Company is certified for quality management system DIN EN ISO 9001:2008. Information on our product certifications and testing can be found on the data sheet. You can also find a list of all WITT certifications at our website.

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

Safety group 645/85-30

connections DN 50 (2- or 4-fold)

Parallel connection of 2 or 4 flashback arrestors model 85-30, ideal for high consumption and high flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV]
- every arrestor 100% tested
- 285 X 430 mm, 44 kg (2-fold), 53 kg (4-fold)
- acetylene max. 392 m³/h
- fuel gases max. 2.740 m³/h
- oxygen max. 1.850 m³/h

This model (4-fold) is also available in stainless steel.

connection	inlet → outlet	order no.
for fuel gases:		
DN 50 (2-fold).....	flange DIN 2633	182-023
DN 50 (4-fold).....	flange DIN 2633	182-007
2" NPT (4-fold)	IG → IG	182-030
for oxygen:		
DN 50 (2-fold).....	flange DIN 2633	182-027
DN 50 (4-fold).....	flange DIN 2633	182-008

Safety group 645/623N

connections DN 65 (4- or 5-fold)

Parallel connection of 4 or 5 flashback arrestors model 623N, ideal for high consumption and high flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV]
- every arrestor 100% tested
- 260 X 384 mm, 44 kg (4-fold), 31/46 kg (5-fold)
- town gas / natural gas max. 1.010 m³/h

connection	inlet → outlet	order no.
for town gas / natural gas:		
DN 65/PN16 (4-fold)	flange DIN 2633	182-014
DN 65/PN16 (5-fold)	flange DIN 2633	182-018

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

SUPER 55

connections 3/8", 1/4"

Resettable Flashback arrestor, certified to DIN EN ISO 5175-1 with pressure sensitive cut-off valve [PV] and visual warning

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet and pressure sensitive cut-off valve [PV]
- stops supply of fuel gas in case of flashback and shows warning signal, easy recommissioning
- every arrestor 100% tested
- BAM certified
- 27.5 X 124 mm
- acetylene max. 10 m³/h
- fuel gases max. 60 m³/h
- oxygen max. 95 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	MG → AGS	146-025
9/16" LH	MG → AGS	146-029
for oxygen:		
G 1/4 RH	MG → AGS	146-027
G 3/8 RH	MG → AGS	146-026
9/16" RH	MG → AGS	146-030

SUPER 78

connections 3/8", 1/4"

Resettable Flashback arrestor, certified to DIN EN ISO 5175, with pressure sensitive cut-off valve [PV] and visual warning, and maximum number of safety elements

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet, pressure sensitive cut-off valve [PV]
- stops supply of fuel gas in case of flashback and shows visual warning that flashback has occurred, easy to reset
- every arrestor 100% tested
- BAM certified
- 63 X 120 mm, 650g
- acetylene max. 11 m³/h
- fuel gases max. 128 m³/h
- oxygen max. 62 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	MG → AGS	125-010
9/16" LH	MG → AGS	125-012
for oxygen:		
G 1/4 RH	MG → AGS	125-016
G 3/8 RH	MG → AGS	125-017
9/16" RH	MG → AGS	125-029

FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

SUPER 66

connections 3/8", 1/4"

Resettable Flashback arrestor, certified to DIN EN ISO 5175, with pressure sensitive cut-off valve [PV] and visual warning, and maximum number of safety elements

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet, pressure sensitive cut-off valve [PV]
- stops supply of fuel gas in case of flashback and shows visual warning that flashback has occurred, easy to reset
- every arrestor 100% tested
- 63 X 160 mm, 1.104 g
- acetylene max. 20 m³/h
- fuel gases max. 225 m³/h
- oxygen max. 105 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	MG → AGS	125-002 5
for oxygen:		
G 1/4 RH	MG → AGS	125-006
G 3/8 RH	MG → AGS	125-007

F53N/HHO

connections 1/4"

Universal flashback arrestor brass for hydrogen-oxygen-mixture, certified to DIN 32508 n° 5.8.2 and 5.8.3, suitable for chlorinators

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV]
- every arrestor 100% tested
- 25 X 68 mm, 172 g
- up to max. 0.5 bar
- air max. 13 Nm³/h

connection	inlet → outlet	order no.
for HHO:		
G 1/4 RH	MG → AGS	145-276

© Did you know? Most of our products are suitable for hydrogen

If you find the „H2 READY“ logo on a product page on our website, you can be sure: This product is suitable for your hydrogen application.

If you miss it somewhere - just ask. Perhaps we can help you anyway. You can reach our specialists here: witt@wittgas.com

E460-1

connections 3/8"

Flashback arrestors certified to DIN EN ISO 5175-1 with nozzle connection

- for individual cylinders
- safety elements: flame arrestor [FA], non-return valve [NV]
- every arrestor 100% tested
- BAM certified
- 86 mm height, 99 g
- acetylene max. 9 m³/h
- fuel gases max. 82 m³/h
- oxygen max. 119 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
4.0 mm - G 3/8 LH nozzle → MG		135-002
6.3 mm - G 3/8 LH nozzle → MG		135-005
8.0 mm - G 3/8 LH nozzle → MG		135-009
9.0 mm - G 3/8 LH nozzle → MG		135-013
for oxygen:		
4.0 mm - G 1/4 RH nozzle → MG		135-014
6.3 mm - G 1/4 RH nozzle → MG		135-017
6.3 mm - G 3/8 RH nozzle → MG		135-018
9.0 mm - G 3/8 RH nozzle → MG		135-022

E460-2

connections 4 up to 9 mm

Flashback arrestors certified to DIN EN ISO 5175-1 for hose mounting

- for individual cylinders
- safety elements: flame arrestor [FA], non-return valve [NV]
- every arrestor 100% tested
- BAM certified
- 99 mm height, 93 g
- acetylene max. 9 m³/h
- fuel gases max. 82 m³/h
- oxygen max. 119 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
4.0 mm - 4.0 mm..... nozzle → nozzle		135-029
6.3 mm - 6.3 mm..... nozzle → nozzle		135-031
8.0 mm - 8.0 mm..... nozzle → nozzle		135-032
9.0 mm - 9.0 mm..... nozzle → nozzle		135-034
for oxygen:		
4.0 mm - 4.0 mm..... nozzle → nozzle		135-037
6.3 mm - 6.3 mm..... nozzle → nozzle		135-038
8.0 mm - 8.0 mm..... nozzle → nozzle		135-039

E460-3

connections 1/4", 3/8"

Flashback arrestors certified to DIN EN ISO 5175-1 with thread connection for torch or cutting machine

- for individual cylinders
- safety elements: flame arrestor [FA], non-return valve [NV]
- every arrestor 100% tested
- BAM certified
- 65 mm height, 107 g
- acetylene max. 9 m³/h
- fuel gases max. 82 m³/h
- oxygen max. 119 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG	135-042
9/16" LH	AGS → MG	135-045
for oxygen:		
G 1/4 RH	AGS → MG	135-046
G 3/8 RH	AGS → MG	135-094
9/16" RH	AGS → MG	135-048

E460-SK

connections 1/4", 3/8"

Flashback arrestors certified to DIN EN ISO 5175-1 with integrated coupling nipple

- for individual cylinders
- safety elements: flame arrestor [FA], non-return valve [NV]
- every arrestor 100% tested
- can be used in conjunction with WITT-coupling system SK100 for quick hose connection / disconnection
- 86 mm height, 112 g
- acetylene max. 9 m³/h
- fuel gases max. 82 m³/h
- oxygen max. 119 m³/h

suitable: coupling body SK100-9

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	probe → MG	135SK-114
9/16" LH	probe → MG	135SK-117
for oxygen:		
G 1/4 RH	probe → MG	135SK-115
G 3/8 RH	probe → MG	135SK-124
9/16" RH	probe → MG	135SK-121

E460-SKU

connections 6.3 and 8 mm, 3/8", 1/4"

Flashback arrestors certified to DIN EN ISO 5175-1 with integrated coupling body

- for individual cylinders
- safety elements: flame arrestor [FA], non-return valve [NV]
- every arrestor 100% tested
- can be used in conjunction with WITT-coupling system SK100 for quick hose connection / disconnection
- 85 mm height, 145 g
- acetylene max. 13 m³/h
- fuel gases max. 68 m³/h
- oxygen max. 187 m³/h

suitable coupling probes: see [quick couplings](#)

connection	inlet → outlet	order no.
for fuel gases:		
6.3 mm	nozzle → coupling body	135SK-001
8.0 mm	nozzle → coupling body	135SK-004
G 3/8 LH	AGS → coupling body	135SK-128
for oxygen:		
6.3 mm	nozzle → coupling body	135SK-002
G 1/4 RH	AGS → coupling body	135SK-127

SK100-9

connections 6.3 and 8 mm, 3/8", 1/4"

Coupling body without non-return valve and coupling probe, accessory for E460SK and E460SKU

- for quick connection and disconnection of the hose
- coupling body for coupling to E460SK
- coupling probe SK100-1 for coupling to E460SKU
- in accordance with EN 561 / ISO 7289

connection	inlet → outlet	order no.
for fuel gases:		
6.3 mm	nozzle ⇄ coupling body	150-021
8.0 mm	nozzle ⇄ coupling body	150-039
9.0 mm	nozzle ⇄ coupling body	150-023
G 3/8 LH	AGS ⇄ coupling body	150-081
for oxygen:		
6.3 mm	nozzle ⇄ coupling body	150-024
8.0 mm	nozzle ⇄ coupling body	150-040
G 1/4 RH	AGS ⇄ coupling body	150-080
G 3/8 RH	AGS ⇄ coupling body	150-079
other gases:		
6.3 mm	nozzle ⇄ coupling body	150-077

FLASHBACK ARRESTORS for torches

RF53NU

connections 1/4", 3/8", 1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for high-performance torches

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- 25.5 X 82 mm, 191 g
- acetylene max. 13 m³/h
- fuel gases max. 68 m³/h
- oxygen max. 187 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG	145-034
G 1/2 LH	AGS → MG	145-035
9/16" LH	AGS → MG	145-236
for oxygen:		
G 1/4 RH	AGS → MG	145-036
G 3/8 RH	AGS → MG	145-037
G 1/2 RH	AGS → MG	145-038
9/16" RH	AGS → MG	145-235

85-10NU

connections 3/8", 1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for high-performance torches

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- 34 X 106 mm, 434 g
- acetylene max. 22 m³/h
- fuel gases max. 235 m³/h
- oxygen max. 310 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG	143-039
G 1/2 LH	AGS → MG	143-231
9/16" LH	AGS → MG	143-245
for oxygen:		
G 3/8 RH	AGS → MG	143-041
9/16" RH	AGS → MG	143-244

85-10NU (eccentric)

connections 3/8", 1/4", 1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for high-performance torches, off-centre connection

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- 34 X 99-118 mm, 417 g
- acetylene max. 22 m³/h
- fuel gases max. 235 m³/h
- oxygen max. 310 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG (eccentric)	143-217
G 1/2 LH	AGS → MG (eccentric)	143-148
9/16" LH	AGS → MG (eccentric)	143-131
for oxygen:		
G 1/4 RH	AGS → MG (eccentric)	143-215
G 3/8 RH	AGS → MG (eccentric)	143-216
G 1/2 RH	AGS → MG (eccentric)	143-152
9/16" RH	AGS → MG (eccentric)	143-132

Find the right products for your welding application.

E460-3

connections 1/4", 3/8"

Flashback arrestors certified to DIN EN ISO 5175-1 with thread connection for torch or cutting machine

- for individual cylinders
- safety elements: flame arrestor [FA], non-return valve [NV]
- every arrestor 100% tested
- BAM certified
- 65 mm height, 107 g
- acetylene max. 9 m³/h
- fuel gases max. 82 m³/h
- oxygen max. 119 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG	135-042
for oxygen:		
G 1/4 RH	AGS → MG	135-046
G 3/8 RH	AGS → MG	135-052

RF53U

connections 1/4", 3/8", 1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for high-performance cutting machines - without temperature-sensitive cut-off valve [TV]

- safety elements: flame arrestor [FA], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- 25.5 X 82 mm, 191 g
- acetylene max. 13 m³/h
- fuel gases max. 68 m³/h
- oxygen max. 187 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG	145-003
9/16" LH	AGS → MG	145-145
for oxygen:		
G 1/4 RH	AGS → MG	145-004
G 3/8 RH	AGS → MG	145-005
G 1/2 RH	AGS → MG	145-006
9/16" RH	AGS → MG	145-144

85-10U

connections 3/8", 1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for high-performance cutting machines - without temperature-sensitive cut-off valve

- safety elements: flame arrestor [FA], non-return valve [NV], filter on the gas inlet
- every arrestor 100% tested
- 34 X 106 mm, 434 g
- acetylene max. 22 m³/h
- fuel gases max. 235 m³/h
- oxygen max. 310 m³/h

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	AGS → MG	143-223
G 1/2 LH	AGS → MG	143-040
for oxygen:		
G 3/8 RH	AGS → MG	143-133
G 1/2 RH	AGS → MG	143-042

Perfect for cutting machines: Dome pressure regulators from WITT

Correct gas dosing is of crucial importance for flame cutting machines.

Dome pressure regulators from WITT are predestined for this with their advanced technology: The constant working pressure ensures a constant gas concentration and thus the quality of the downstream processes.

Read the article „[The design makes the difference](#)“ from our news section.

FLASHBACK ARRESTORS for high flows

RF53N/30

connections 3/8"

Flashback arrestors certified to DIN EN ISO 5175-1 for higher flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV] (for low pressure applications without non-return valve)
- every arrester 100% tested
- 25.5 X 82 mm, 191 g
- 65 mm height, 107 g
- fuel gases 16 m3/h
- air 12 m3/h

connection	inlet → outlet	order no.
with non-return valve:		
G 3/8 LH	MG → AGS	145-120
without non-return valve:		
G 3/8 RH	MG → AGS	145-136

RF53N/30

connections 1/4", 3/8", 1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for higher flows

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV], non-return valve [NV] (for low pressure applications without non-return valve)
- every arrester 100% tested
- 25.5 X 82 mm, 191 g
- 65 mm height, 107 g
- fuel gases 30 m3/h
- air 21 m3/h

connection	inlet → outlet	order no.
with non-return valve:		
G 3/8 LH	MG → AGS	143-118
G 1/2 LH	MG → AGS	143-121

without non-return valve:		
G 1/2 LH	MG → AGS	143-200
1/4" NPT	IG → IG	143-168

FLASHBACK ARRESTORS for high flows

270N/NU

connections 3/4" up to 1.1/2"

Flashback arrestors certified to DIN EN ISO 5175-1 for very high flows

- safety elements: flame arrestor [FA], non-return valve [NV] temperature-sensitive cut-off valve [TV]
- every arrestor 100% tested
- 62 X 131-160 mm, 1.400-1.700 g
- acetylene max. 22 m³/h
- fuel gases (without acetylene) max. 371 m³/h
- air max. 164 m³/h

FLASHBACK ARRESTORS for central acetylene supply

FN 12 / FN 40

connections 1.1/2"

Decomposition arrestor, stops dangerous decomposition of acetylene in low-pressure pipelines - up to 1.5 bar

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV]
- stops the explosive decomposition of acetylene via pressure-controlled quick-acting piston valve
- every arrestor 100% tested
- BAM certified
- DIN EN ISO 14114
- 70 X 160/200 mm, 3.091-3.846 g
- FN12 Q= ca. 76 m³/h
- FN40 Q= ca. 140 m³/h

connection	inlet → outlet	order no.
F12		
G 1.1/2 RH	IG → IG	021-001
F40 (double flow capacity)		
G 1.1/2 RH	IG → IG	021-003

Safety group 645 / FN 40

connections DN 50 (2- or 4-fold)

Parallel bundle of 2 or 4 decomposition arrestors FN4, to protect against dangerous decomposition of acetylene in low-pressure pipelines, for high flow rates - up to 1.5 bar

- safety elements: flame arrestor [FA], temperature-sensitive cut-off valve [TV]
- stops the explosive decomposition of acetylene
- every arrestor 100% tested
- DIN EN ISO 5175-1
- 470 X 260 mm, 46 kg
- Q= ca. 560 m³/h

connection	inlet → outlet	order no.
DN 50 (2-fold)	flange DIN 2633	182-001
DN 50 (4-fold)	flange DIN 2633	182-002

HDS17

connections 3/4"

Shut-off device stops dangerous decomposition of acetylene in the high-pressure pipelines - up to 25 bar

- stops the explosive decomposition of acetylene via pressure-controlled quick-acting piston valve
- every arrestor 100% tested
- BAM certified
- TRAC 206
- DIN EN ISO 15615
- DIN EN ISO 14114
- 50 X 152 mm, 1.797 g
- up to 25 bar working pressure

connection	inlet → outlet	order no.
G 3/4 RH	 IG → IG	017-001

HRV 650

connections 1.1/2"

Bundle connection with non-return valve, for direct connection to a cylinder bundle

- with non-return valve certified to EN ISO 14114
- tested in accordance with DIN EN ISO 15615
- every arrestor 100% tested
- for a rapid, easy and thus safe replacement of the acetylene cylinder bundle
- no tools required
- dimensions: 172 mm, 865 g
- up to 25 bar working pressure

connection	inlet → outlet	order no.
„Linde“		
M 28x1.5 LH - M 24x1.5 RH	 IG → MG	210000011
„Messer“		
M 28x1.5 LH - M 24x1.5 RH	 IG → MG	210000020

MGN

connections 1/2", 1/4"

Decomposition arrestor stops dangerous decomposition of acetylene in the high-pressure pipes of bottling plants - up to 25 bar

- safety elements: flame arrestor [FA], optional: non-return valve [NV]
- opening pressure approx. 60 mbar
- every arrestor 100% tested
- DIN EN ISO 14114
- EIGA acetylene IGC DOC 123/4
- 29.5 X 88.5 mm, 385-412 g
- up to 25 bar

connection	inlet → outlet	order no.
G 1/2 RH - W 21.8x1/14	AG → AG	022-014
G 1/4 RH - G 1/4	AGS → IG	022-011

HD-NV

connections 1/4"

High-pressure non-return valve to be screwed onto the gas cylinder by using a bow - up to 25 bar

- for bows according to DIN 477, part 1, no. 3
- every arrestor 100% tested
- EN ISO 15615
- up to 25 bar

connection	inlet → outlet	order no.
HD-NV	DIN → G 1/4 RH AGS	210000022
HD-NV incl. bow..	DIN → G 1/4 RH AGS	210000022B

SK100-1

for torches

- rapid connection and disconnection of the hose
- simple and robust colour-coding of body and nipple
- nipple with non-return valve and self-acting gas lock
- coupling nipple made of durable stainless steel
- certified to DIN EN 561/ ISO 7289
- every hose coupling 100% tested

connection	inlet → outlet	order no.
------------	----------------	-----------

probe

for fuel gases:

G 3/8 LH probe → MG 151-001

for oxygen:

G 1/4 RH probe → MG 151-003

G 3/8 RH probe → MG 151-004

for other gases:

G 1/4 RH probe → MG 151-005

body (also for SK100-2)

for fuel gases:

4.0 mm nozzle → coupling body 150-001

6.3 mm nozzle → coupling body 150-003

8.0 mm nozzle → coupling body 150-004

9.0 mm nozzle → coupling body 150-005

G 3/8 LH AGS → coupling body 150-064

for oxygen:

4.0 mm nozzle → coupling body 150-007

6.3 mm nozzle → coupling body 150-009

8.0 mm nozzle → coupling body 150-010

G 1/4 RH AGS → coupling body 150-061

G 3/8 RH AGS → coupling body 150-060

for other gases:

6.3 mm nozzle → coupling body 150-013

G 1/4 RH AGS → coupling body 150-063

G 3/8 RH AGS → coupling body 150-062

🎯 Small differences with a big effect

What makes WITT quick couplings so special?

Watch our video to find out what features our quick couplings have and how they benefit you as a customer.

SK100-2

for hoses

- rapid connection and disconnection of the hose
- simple and robust colour-coding of body and nipple
- flexible extension of hose if required
- nipple with non-return valve and self-acting gas lock
- coupling nipple made of durable stainless steel
- certified to DIN EN 561/ ISO 7289
- every hose coupling 100% tested

connection inlet → outlet order no.

probe (also for SK100-3)

for fuel gases:

4.0 mm	probe → nozzle	151-007
6.3 mm	probe → nozzle	151-009
8.0 mm	probe → nozzle	151-010
9.0 mm	probe → nozzle	151-011

ULTRA 10

connections 1/2"

Ultra performance protection against gas return: compact, quiet, ideal for low pressure applications

- safety element: non-return valve [NV]
- every non-return valve 100% tested
- according to DIN EN ISO 5175-1 / DIN EN ISO 5175-2
- ultra-low opening pressures (4 mbar), ultra-low pressure drop
- compact and light: 35 X 60 mm, 221 g
- minimal noise emission
- dirt filter (100 µm) on gas inlet
- up to 16 bar

Also available in stainless steel

connection	inlet → outlet	order no.
G 1/2 RH	IG → IG	034-003
1/2 " NPT	IG → IG	034-007

design (standard):

filter: yes seal o-ring: NBR seal valve: CR housing: brass

ULTRA 12

connections 1/2"

Based on ULTRA 10 – your customised design: multiple combinations of housing and seal materials, with or without filter

- free combination of material for housing (brass, stainless steel, aluminum) and seal (NBR/CR, FPM/FKM, EPDM/FFKM), with or without filter
- for special requirements e.g. corrosive environments, acetylene, light-weight construction, temperatures above 70 °C/ 158 °F

based on ULTRA 11 including:

- safety element: non-return valve [NV]
- every non-return valve 100% tested
- DIN EN ISO 5175-2
- ultra-low opening pressures (4 mbar), ultra-low pressure drop
- compact and light: 35 X 60 mm, 221 g
- minimal noise emission
- up to 16 bar

connection	inlet → outlet	order no.

Why ULTRA?

WITT has achieved a leap in performance in non-return valves.
Read all about our latest successful model in this brochure.

ULTRA performance

New valve design - flow optimised
Maximum flow, minimal nominal size

ULTRA low opening pressure

From 4 mbar - ideal for low pressure applications
When every mbar counts

ULTRA compact

Small and lightweight
Perfect for compact plant designs

ULTRA silent

No fluttering - lowest noise emission
Less wear - longer service life

ULTRA flexible

Free combination of materials on request
Exactly suitable for your requirements

ULTRA safe

Reliably stops gas backflow and flashback

ULTRA 22

connections 1/2", 3/4", 1"

Based on ULTRA 20 – your customised design: multiple combinations of housing and seal materials, with or without filter

- free combination of material for housing (brass, stainless steel, aluminum) and seal (NBR/CR, FPM/FKM, EPDM/FFKM), with or without filter
- for special requirements e.g. corrosive environments, acetylene, light-weight construction, temperatures above 70 °C/ 158 °F

based on ULTRA 20 including:

- safety element: non-return valve [NV]
- every non-return valve 100% tested
- DIN EN ISO 5175-2
- ultra-low opening pressures (4 mbar), ultra-low pressure drop
- compact and light: 52 X 67.5 mm, 510 g
- minimal noise emission
- up to 16 bar

ULTRAVENT 6

connections 1/8"

Safety Relief Valve for venting excess pressure from receivers, pipelines and other equipment - ultra high blow-off performance

- spring-loaded, direct-acting safety relief valve
- flow-optimised valve system for maximum blow-off capacity
- every safety relief valve 100% tested
- TÜV-certification of pressure setting
- tested according to DIN EN ISO 4126-1
- can also be used as a control valve or as a vacuum breaker
- dimensions: 36 x 19 mm
- 5 up to 500 mbar

Also available in stainless steel 1.4404.

⊙ Revolution in blow-off performance

Compared to conventional safety valves, the new ULTRAVENT 6 from WITT offers a much higher blow-off performance despite its small size.

The pioneering optimised flow design makes this possible. Let us convince you!

Would you like to find out more about the innovations from WITT?

Then take a look at our website and read our long history of innovation.

AV 619

🕒 Safe and efficient - WITT products for hydrogen applications

The future belongs to hydrogen and with WITT you are H₂-READY! Hydrogen (H₂) is already widely used as a raw material or process gas in industry in a variety of applications. As 'green hydrogen' based on renewable energies, the gas is even regarded as the energy source of the future.

However, hydrogen is highly flammable, reactive and explosive when mixed with oxygen. The requirements for the necessary equipment and gas safety technology are correspondingly high.

WITT specialises in hydrogen applications and offers you the right gas technology at the highest quality level. In this video Andrew Smart shows you which products WITT offers to support your hydrogen application to the maximum.

F53 Deto

connections 1/4"

Detonation Flame Arrestor / Deflagration Volume Protector F53
stainless steel device for gas type group IIC, suitable for the protection of gas analysers, plants and equipment

- safety elements: flame arrestor [FA]
- every device 100% tested PTB tested
- DIN EN ISO 16852
- ideal for installation in pipework up to a nominal diameter of DN10 and for protecting equipment, e.g. gas analysers
- ideal as volume protection for systems and system components with a maximum volume of 4.6 litres
- 25 X 68 mm, 207 g
- inlet and outlet screw connection, housing: stainless steel 1.4305 / AISI 303
- flame arrestor: stainless steel 1.4404 / AISI 316L

connection	inlet → outlet	order no.

F53N Deto

connections 1/4" - with cut-off valve

The deflagration volume protection device is ideal for protection of plants and equipment with a volume of max. 4.6 l.
Suitable as a detonation flame arrester ideal for mounting in small pipelines and to protect appliances, for example gas analysers.

- safety elements: flame arrestor [FA], temperature sensitive cut-off valve [TV]
- every device 100% tested
- PTB tested
- DIN EN ISO 16852 / II G IIC
- as deflagration volume protection ideal for systems and system components with a maximum volume of 4.6 litres
- as detonation flame arrestor ideal for installation in small pipework and for protecting equipment, e.g. gas analysers
- designed for short burning with a burning time tBT=4 min
- 25 X 68 mm, 207 g
- inlet and outlet screw connection, housing: stainless steel 1.4305 / AISI 303
- flame arrestor: stainless steel 1.4404 / AISI 316L

connection	inlet → outlet	order no.

deflagration volume protection F53N: G 1/4" (o-ring FKM)	IG → IG	145-337
---	---------------	---------

detonation flame arrester F53N: G 1/4" (o-ring FFKM)	IG → IG	145-336
---	---------------	---------

ULTRA 10

connections 1/2"

Ultra performance protection against gas return: compact, quiet, ideal for low pressure applications

- safety element: non-return valve [NV]
- every non-return valve 100% tested
- according to DIN EN ISO 5175-1 / DIN EN ISO 5175-2
- ultra-low opening pressures (4 mbar), ultra-low pressure drop
- compact and light: 35 X 60 mm, 221 g
- minimal noise emission
- dirt filter (100 µm) on gas inlet
- up to 16 bar

connection	inlet → outlet	order no.
G 1/2 RH	IG → IG	034-004
1/2 " NPT	IG → IG	034-008

design stainless steel 1.4305 (standard):

filter: yes seal o-ring: NBR seal valve: CR

ULTRA 12

connections 1/2"

Based on ULTRA 11 - your customised design: multiple combinations of housing and seal materials, with or without filter

- free combination of material for housing (brass, stainless steel, aluminum) and sealing (NBR/CR, FPM/FKM, EPDM/FFKM), with or without filter
- for special requirements e.g. corrosive environments, acetylene, lightweight construction, temperatures above 70 °C/ 158 °F

based on ULTRA 11 including:

- safety element: non-return valve [NV]
- every non-return valve 100% tested
- DIN EN ISO 5175-2
- ultra-low opening pressures (4 mbar), ultra-low pressure drop
- compact and light: 35 X 60 mm, 221 g
- minimal noise emission
- up to 16 bar

connection	inlet → outlet	order no.

800-ES

connections 1/4"

Non-return valve for the prevention of unintended gas mixtures, up to 16 bar for use in thermal processing plants, certified to EN 746-2

- safety element: non-return valve [NV]
- every non-return valve 100% tested
- also ideal for use with corrosive gases
- small and light: 17.5 X 70 mm, 730 g
- up to 300 bar

connection	inlet → outlet	order no.
1/4" NPT	AG → AG	311-002

☉ For specific needs: gas safety devices in stainless steel

Anyone working with hydrogen, corrosive gases or pure gas requires a material that is especially designed for these conditions: stainless steel. Therefore WITT offers a wide range of stainless steel safety devices.

The latest production technologies, high-quality stainless steel (e.g. 1.4305/AISI 303, 1.4404/AISI 316L, 1.4541/AISI 321) and elastomers as well as a sophisticated quality management system guarantee highest quality. As a matter of course, WITT products fulfill all relevant international standards and norms. For your safety.

Further information on www.wittgas.com and in our „Stainless steel“ brochure.

ADR 150F

manifold pressure regulator for acetylene up to 150 m³/h

Manifold pressure regulator for the regulation of high flows from cylinder batteries / bundles

- for a stable working pressure and a safe workplace
- setting of required pipeline pressure is adjusted by the spindle valve
- requires no additional pilot gas

connections	inlet pressure	outlet pressure	order no.
-------------	----------------	-----------------	-----------

DN 25 (DIN 3861) → flange DN 50/PN 40 (DIN 2656)	25 bar	1.5 bar	210-010
--	--------	---------	---------

special version up to 2 bar outlet pressure (on demand)

ADR 75

up to max. 75 m³/h

Powerful dome pressure regulator for acetylene for the regulation of medium flows on manifolds and bundles

- extremely stable outlet pressure independent of inlet pressure and flow rate
- ideal control of medium flow rates at cylinder batteries or bundle systems
- due to ultra-low pressure loss, the dynamic pressure of the ADR 75 is as close as possible to 1.5 bar
- for optimum emptying of bundle and trailer systems
- BAM type-approval testing according to DIN EN ISO 7291:2021-03 No. 9.4.6
- complies with the requirements of German TRGS 407 Annex 4 Acetylene

connections	inlet pressure	outlet pressure	order no.
G 3/4 IG → G 1 IG	25 bar	1.5 bar	210-018
special version up to 2.5 bar outlet pressure (on demand)			

ADR 150

up to max. 150 m³/h

Powerful dome pressure regulator for acetylene for the regulation of high flows on manifolds and bundles

- for a stable working pressure and a safe workplace
- for optimum emptying of bundles
- extremely stable outlet pressure
- integrated blow-off valve

connections	inlet pressure	outlet pressure	order no.
DN 25 (DIN 3861) → flange DN 50/PN 40 (DIN 2656)	25 bar	1.5 bar	210-002
special version up to 2 bar outlet pressure (on demand)			

DOME PRESSURE REGULATORS

series 737LE

connections 3/4" / Kv value 2.4

High-performance dome-loaded pressure regulators. For high and varying flows requiring maximum pressure stability. A complete solution, applicable as a manifold pressure regulator per DIN EN ISO 7291.

- high pressure stability even during flow and temperature fluctuations
- outlet pressure range 0.5-10 bar
- suitable for various technical gases
- ready-to-use
- option: lockable spindle hood against unauthorized adjustment

connections	max. inlet pressure*	outlet pressure	order no.

Various installation positions for individual customisation

User-friendly and standardised connections ensure simple and quick integration into the pipework system. The installation can be carried out indoors or outdoors.

Your WITT consultant will work with you to configure the necessary adaptations.

series 737LE-HD

connections 3/4", 1" / Kv value 1.65 - high pressure model

High-performance dome-loaded pressure regulators for installation in pipelines or as manifold pressure regulator per DIN EN ISO 7291. For high and varying flows requiring maximum pressure stability.

- high pressure stability even during flow and temperature fluctuations
- outlet pressure range 0.5-60 bar
- suitable for high pressures at inlet, up to 300 barg
- burn-out safety for O₂ up to 200 bar (BAM report AZ 17055507)
- set includes integrated pilot pressure regulator, and stainless steel pressure gauges, completely assembled and tested
- ready-to-use
- inlet: G 3/4", outlet: G 1" IG
- option: lockable spindle hood against unauthorized adjustment
- different mounting parts available (maintenance kit see [page 106](#))
- easy to install and to integrate directly into the process
- 1: 1 interchangeable with the previous version (please specify if desired)

connections	max. inlet pressure*	outlet pressure	order no.

747LE/S SMART

connections 1" / Kv value 3.6

High performance dome-loaded pressure regulator set for inline installation, combined with high-tech sensor technology and electronic components.

- signaling of inlet, outlet and pilot pressure
- signaling of inlet and outlet temperature
- indication of the instantaneous gas flow rate
- digital display (optional)
- ideal for connected manufacturing

All models of the 747LE/S dome pressure regulator are available as Smart models.

The following surcharges are added to the price of the desired model:

Smart model variations

„Standard“

overview mounting parts:

767LE/S SMART

connections 3", flange DN80/100 / Kv value 30

High performance dome-loaded pressure regulator set for inline installation, combined with high-tech sensor technology and electronic components.

- signaling of inlet, outlet and pilot pressure
- signaling of inlet and outlet temperature
- indication of the instantaneous gas flow rate
- digital display (optional)
- ideal for connected manufacturing

All models of the 767LE/S dome pressure regulator are available as Smart models.

The following surcharges are added to the price of the desired model:

Smart model variations

„Standard“

Display, indication of inlet pressure and temperature as well as outlet pressure and temperature

„Standard + P3“

„Standard“ features, plus indication of pilot pressure

„Standard + Flow“

„Standard“ features, plus indication of flow rate

„Standard + P3 + Flow“

„Standard“ features, plus indication of pilot pressure and flow rate

signal cable (5 m) order no. 803.172800
(3 cables are required to operate the device)

for mounting parts, options and maintenance kit see model 767LE/S Brass

overview mounting parts:

P1 - inlet pressure
T1 - inlet temperature
P2 - outlet pressure
T2 - outlet temperature
P3 - pilot pressure
FR - flow rate

Backpressure Regulator BPR 2

connections 2"

Backpressure regulators are used for process gas supply, in which the pressure must be kept or limited, e.g. for regulating the pressure of gas cushions in tanks

- rapid and accurate monitoring of inlet pressure provides process reliability
- ideal e.g. for pressure regulation from gas cushions in tanks
- operating pressure 0,5 - 20 bar
- available in brass or stainless steel
- ATEX 2014/34/EU with ignition hazard analysis according to EN 1127-1, DIN EN 13463-1 and ZH1/200
- fulfils the requirements of EU Regulations (EC) 1935/2004, and (EC) 2023/2006
- fulfils the requirements of German Food and Feed (LFGB) Law, and is suitable for contact with food gases
- integrated connections for pilot gas and manometer

connections adjustable upstream pressure order no.

Plant engineering

planning and installation

parallel construction with 757LE/S

757LE/S with flange filter

Individual construction and mounting according to customer requirements

- planning and installation by a WITT specialist
- free of oil and grease
- suitable for oxygen
- tested and ready to use

Individual parallel construction

Example I:

4 ball valves stainless steel DN50/PN40
2 dome pressure regulators 757LE/S
manifold DN50, counter-flange, TÜV-testing, CE labeling
installation on welded mounting frame

Example II:

dome pressure regulator 757LE/S
with flange filter 50 µm filter fineness, for oxygen up to 30 bar
with dirt catcher
delivery completely assembled and tested

More customisations possible, for example central filter, safety valve,
other connection sizes, etc.

Suitable for oxygen, tested and ready for use, short delivery time

🎯 Maximum precision and unparalleled consistency: see how WITT Dome-loaded Pressure Regulators work

Whenever the highest pressure stability is required, even with fluctuating inlet pressures and flowrates, WITT dome pressure regulators are the best choice.

Watch [our video](#) and learn why they show such a unique performance. Find out about highly diverse application and customization possibilities.

Pressure regulating station

1-fold

Mobile pressure regulating station, completely mounted and tested, ready-to-use

- for bundles
- with pressure regulator and safety devices
- for a stable working pressure and a safe workplace
- for temporary high gas requirement on construction sites
- for fuel gases, oxygen and shielding gas
- robust design with shelter and handle
- with HD ball valve in the inlet

	order no.
oxygen (300 bar/ 0-20 bar)	190211111
acetylene (25 bar/ 0-1.5 bar)	183112120

Pressure regulating station

4- or 6-fold

Mobile pressure regulating station, completely mounted and tested, ready-to-use

- at temporary high gas requirement on construction sites
- for fuel gases, oxygen and shielding gas
- robust design with shelter and handle
- with HD ball valve in the inlet
- for bundles with 4-6 integrated outlet points
- including flashback arrestors 85-10
- for oxygen with pressure regulator
- customisations available

	order no.
4-fold oxygen (300 bar/ 0-10 bar)	183000044
6-fold oxygen (300 bar/ 0-10 bar)	183000049
4-fold acetylene (25 bar/ 0-1.5 bar)	183000045
6-fold acetylene (25 bar/ 0-1.5 bar)	183000050

Universal 704

distribution station 4- or 6-fold

Portable outlet point unit with robust framework

- for a stable working pressure and a safe workplace
- with outlet point ball valves, outlet point pressure regulator, flashback arrestors
- for 4 or 6 outlet points and up to 5 types of gases
- option: stackable design
- for pipelines or connected to model 642
- including flashback arrestors 85-10
- for oxygen with pressure regulator
- customisations available

order no.

4-fold oxygen (40 bar/ 0-10 bar)
und acetylene (1.5 bar) 183000030

6-fold oxygen (40 bar/ 0-10 bar)
und acetylene (1.5 bar) 183000031

Universal V6

distribution station 4- or 6-fold

Portable outlet point unit with V-frame

- for a stable working pressure and a safe workplace
- with outlet point ball valves, outlet point pressure regulator, flashback arrestors
- for 4 or 6 outlet points
- for pipelines or connected to model 642
- including flashback arrestors 85-10
- for oxygen with pressure regulator
- customisations available

order no.

6-fold oxygen (40 bar/ 0-10 bar) 183000153

6-fold acetylene (1.5 bar) 183000154

Pressure regulation station

684NG, single left

acetylene (25 bar)

For ensuring continuous acetylene supply into a ring pipeline

- DIN EN ISO 14114, acetylene regulation (TRAC)
- pressure regulators in accordance with ISO 7291
- completely mounted and tested, easy wall-mounting
- option: automatic switch-over (WITT-SWITCH)

Illustrations exemplary

Series 503

3-fold, for cutting machines

Outlet point with integrated gas filters for the supply of cutting machines, for fuel gas, heating- and cutting-oxygen

- with gas filter 622 for increased service life of downstream fittings and equipment
- with flashback arrestor 85-10 against reverse gas flow and flashbacks
- nickel-plated tube with nickel-plated wall screens
- inlet with fittings and ball valves, incl. gas filter 622, flashback arrestor 85-10
- DIN EN ISO 5175 preventing counter flow and flashback
- completely mounted and tested

order no.

outlet point 503 3-fold

280030091

1x acetylene, P inlet max. 1.5 bar, max 4.5 m³/h
(inlet welding nipple OD 21.3mm, ball valve DN 10,
gas filter 622, pressure regulator, flashback arrestor 85-10,
outlet G 3/4 LH male with cone)

1x oxygen for heating, P inlet max. 16 bar, max 45 m³/h
(inlet pipe coupler for pipe 15x1, ball valve DN 10,
gas filter 622, pressure regulator, flashback arrestor 85-10,
outlet G 3/4 RH male with cone)

1x oxygen for cutting, P inlet max. 16 bar, max 68 m³/h
(inlet pipe coupler for pipe 15x1, ball valve DN 10,
gas filter 622, pressure regulator, flashback arrestor 85-10,
outlet G 3/4 RH male with cone)

☉ Quality and safety for more than 75 years

Read on our website what WITT has achieved in 75 years of company history.

Find out about facts and figures, our quality standards, and marvel at our long history of innovation.

www.wittgas.com

series 722

for flashback arrestors and non-return valves

Test rig for the annual testing of flashback arrestors and non-return valves up to DN 50

- leak-tightness to atmosphere
- non-return valve against low and high back pressure
- operating pressure of pressure sensitive gas cut off valve
- measuring of flow capacities of flashback arrestors

	order no.

adapters for other connections on demand	

☉ WITT - for your safety and peace of mind

Ever increasing legal requirements plus the moral and financial costs of accidents place an even higher onus on safety.

Therefore, each company dealing with technical gases is well advised to make a realistic risk assessment and be sure to be following best practices. Flashback arrestors and most other components of gas supply (acetylene, O₂, other fuel gases, inert gas) should be checked for safety at least annually.

WITT can support you: by providing advice and service as well as suitable test equipment - for your operating and legal certainty.

Talk to us: witt@wittgas.com or tel. 0049-(0)2302-89010

LK

lance holder

Lance holders for oxygen lances 6 mm – 1.1/4"

replacement filter		FI-057

807

pure filter 5 µm

For reliable protection against micro-contamination of gases, e.g. in laboratories or burner supplies in the glass industry (approx. 5 µm)

- increases service life of downstream fittings and equipment
- finest filtering performance eliminates product waste
- high flowrate - for flow optimised design
- corrosion resistant filter insert (approx. 5 µm) stainless steel fibre fleece
- every gas filter 100% tested
- 21 X 58 mm, ca. 120 g

model	connection	order no.
807 - brass, chemisch nickel plated		
	1/4" NPT IG	185-002
807 - stainless steel 1.4404		
	1/4" NPT IG	185-006
replacement filter		956333400

LE6

very high flow rates, DN100 / PN 40

For reliable protection against contamination by ultrafine filtering of particulates and moisture (approx. 15 µm), heavy unit for very high flow rates

- designed for Oxygen Service in accordance with EIGA, AIGA and CGA
- downstream equipment performance improvement
- can extend service life and reduce maintenance requirements of downstream equipment
- in-line maintenance, saves time and money
- very high flow rates, with low pressure drop
- ideal in combination with dome pressure regulator 767LE (including with smart-option)
- certainty of safety and functionality - every filter is 100% tested

model	connections	order no.
LE6	flange DN 100/PN40 pressure monitoring: G 3/8 IG	078-001
replacement filter		FI-LE6
packaging	(surcharge due to high expenditure)	

Our gas filter in a new dimension

Our new gas filter LE6 is the perfect complement to the dome pressure regulator 767LE/S and 767LE/S SMART.

With its 3" connection and a 15 µm filter fineness, it is suitable for up to 40 bar max. operating overpressure (oxygen 30 bar, CO2 25 bar).

The flow-optimised design enables a high flow rate and thus ensures the process quality of even the largest systems.

Ball Valve with Female Thread

for acetylene

According to DIN ISO 228/1, PN25

- up to max. 1.5 bar working pressure
- housing: steel
- different connections and length

DN / connection	length	order no.
6 / G 1/4	50 mm	198105050
8 / G 3/8	55 mm	198107071
12 / G 1/2	75 mm	198109091
20 / G 3/4	80 mm	198111110

32 / G 1.1/4	110 mm	198215150
40 / G 1.1/2	120 mm	198217172

Ball Valve with Male Thread

for fuel gases, oxygen, shielding gas

With threaded connectors, EN 560, PN40

- up to max. 40 bar working pressure, acetylene max. 1.5 bar
- housing nickel-plated brass
- reliable protection against burnout
- connections G 3/8, length 89 mm
- suitability and usability of the pressure PN 40 is proved by BAM reports

DN / connection	length	order no.
for acetylene (max. 1.5 bar):		
10 / G 3/8 RH AGS - G 3/8 LH AGS	89 mm	198107082
for fuel gases (max. 40 bar):		
10 / G 3/8 RH AGS - G 3/8 LH AGS	89 mm	198107082
for oxygen (max. 30 bar):		
10 / G 3/8 RH AGS - beidseitig	89 mm	198207072
for shielding gas (max. 40 bar):		
10 / G 3/8 RH AGS - beidseitig	89 mm	198307078

Ball Valve with Flanged Connection

for fuel gases, oxygen, shielding gas

According to EN 558-1 (DIN 3202), PN25 / PN40

- up to max. 25 bar / 40 bar working pressure, acetylene max. 1.5 bar
- oxygen PN 10
- housing: steel
- reliable protection against burnout
- connections DN20-DN100, length 150-190 mm
- up to DN 25 FTF-1 according to EN 558-1 (DIN 3202)
- from DN 32 FTF-27 according to EN 558-1 (DIN 3202)

🎯 Everything from a single source

At WITT-Gasetechnik you will find a uniquely wide-ranging portfolio of products for various areas of gas technology.

No matter whether you need gas mixers, gas analysers, leak testers, safety fittings for welding and cutting, gas non-return devices for biogas plants or automatic pressure control stations for a central gas supply, whether you are looking for large systems or small components: In most cases, we can help. To make things easier for you.

If you are missing something or have special requirements, please contact us. We will develop solutions together.

Types of threads

IG -
simple
female thread

AG -
simple
male thread

MG -
female thread with ball head,
metallic self-sealing

AGS -
male thread with
counterbore

Turning of threads:

- RH** right-handed
LH left-handed

Training

Topics:

- Gas safety equipment
- Gas mixing systems
- Gas analysis systems
- Leak detection systems

The training will be tailored to the knowledge of the attendees, with theory and practical elements as required. By request a test can be held at the end of the training.

Daily rate (per person): Including lunch, excluding hotel accommodation on demand

Location: WITT headquarter in Witten

Minimum attendance: 4 persons

Maximum attendance: 8 persons

Documentation, Certification and Instruction manuals
